

We are happy to provide the following information on Child Restraint Guidelines for CanaDream RV's.

Child seat regulations for driving cars vary by province in Canada. CanaDream's guidelines are based on the most restrictive provincial policies. In Canada there are no regulations for having child seats in taxi or coach services. There are also no specific regulations in Canada requiring additional fixed points specific to child seats in RV's. Nor is there specific legislation dealing with the use of child seats in motorhomes.

CanaDream RV's are fitted with safety airbag systems in the front seats of each unit which makes front seats unsuitable for children under the age of 13.

In the chart below, you will see 3 different types of child seats: Infant, Child and Booster (for the appropriate age/height/weight of child). Alongside this, is the number of each type of seat which our units can accommodate:

A child seat can be held in place with both a tether strap and the lap seat belt, as shown in the image below.

Please remember ...

- When reserving the RV, you can request the rental of a child or a booster seat (for a fee). We do not provide infant seats.
- Guests are responsible for fitting the child/booster seat in the RV.
- It is important that you specify which type of child seat you require at time of booking. We strongly recommend that you pre-book your child seat(s) as availability is limited.
- If you are making use of our complimentary airport/airport hotel pick up for Toronto, Montreal or Halifax, please also request the appropriate child/booster seat(s) for the transfer. This can be done on the evening before or the morning of pick up.

MHA/MHB/SVC

We guarantee 1 fixed tether anchor in each of our MHA/MHB/SVC units. The green dot represents where the tether anchor is located. While it is possible to house a combination of child seats around the dinette, only 1 can be fixed to the tether anchor. The others will need to be attached solely by the lap belt.

DVC

The DVC has no fixed tether anchors. The rear bench can accommodate 2 child seats which can be secured with the lap belts.

TCA

The Truck Camper has 3 seats in the rear of the truck with 3-point harness seat belts. Each with their own tether anchor. The trucks can accommodate 3 child seats of any type.
